**DETAILED ACTION**

***Election/Restrictions***

The following is a supplemental restriction requirement necessitated by the amended claims filed on 10/19/07.

Applicant's election without traverse of group III, claims 3 and 17, in the reply filed on 10/19/07 is acknowledged. Due to the amendments to the claims filed on 10/19/07, claims 3-5 and 7-19 will be examined as the elected group, group III. However, although applicant amended claims to depend from claim 3, applicant did not take into consideration that claims 4 and 5 were previously subject to a species election requirement.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claims 4 and 5 recite multiple immunosuppressant species. Each of the immunosuppressants is structurally and functionally unique within the context of the invention, each requiring a separate and distinct search and corresponding examination. Therefore, applicant is required to elect one immunosuppressant or one specific combination of immunosuppressants from the claims for examination.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply

must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). Currently, claim 3 is generic.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 (a) of the other invention.
